NUCLEAR ENERGY - delivering the future

The 2017 Nuclear Africa Conference is designed to bring significant players together so that the exciting South African nuclear power expansion plans can be moulded towards the conference theme of: **International Collaboration in Nuclear**. As in past events a forceful collection of speakers and players will be assembled.

NUCLEAR AFRICA CONFERENCE 2018 PROMOTIONAL OPPORTUNITIES

- 1 • Sponsorship Packages
- 2 • Exhibition Packages

- Members of the media

In collaboration with:

Sponsor Partners:

Media Partners:

The most prominent African nuclear gathering of the year!

CONFERENCE OBJECTIVES

- Develop a positive and proactive approach to the nuclear power planning and implementation process in South Africa.
- Show that South Africa, and other African countries, have the skills, technology and competitive ability to implement nuclear power options.
- Provide a forum for people to access the entire spectrum of expertise from research and development, to the construction and fabrication of nuclear power assemblies and installations.
- Address public interest issues such as safety, legislation, and the handling of nuclear waste, amongst others.
- Explore collaborative relationships with the international community, who will be attending the conference.
- Explain why much of Africa needs to develop nuclear energy capability, and why it needs to start now, not later. Innovative new systems exist.
